Define your problem statement

What problem are you trying to solve? Frame your problem as a "How Might We" statement. This will be the focus of your brainstorm.

How Might We Smart waste management system for metropolitan cities.

Give a brief overview or record a loom of the project

Brainstorm

Write down any ideas that come to mind that address your problem statement. Remember, the key rules of brainstorming are:

Advice

- Defer judgment
- Go for volume
- Build on the ideas of others
- 📡 우Stay on topic
- Encourage wild ideas
- Be visual

PRO TIP: Select a sticky note and click the pencil icon in the menu to sketch.

Group ideas

The facilitator should group all the ideas from the brainstorming process (step 2).

Group 2

After that, you should add your opinions by adding arrows to point ideas into other groups and sticky notes and icons to share your thoughts.

PRO TIP: This is a great place to use color coding. You can change the color of multiple sticky notes at once.

Group 4

A communication system that transfers this data to Cloud, data is processed in the Cloud, thus, the route of collection trucks is optimized.

Prioritize

The facilitator should copy and paste the groups from step 3 into this area and setup the vote details. Let's vote! Add a vote on sticky notes you think are a high priority. You can also add your vote to an entire group.
